

Annual Report 2021

WORDS FROM PRESIDENT AND

Chief Executive Officer

The year 2021 presented significant financial challenges, as the ongoing need for pandemic PPE created an unforeseen funding gap, necessitating greater resourcefulness and reliance on our supportive community.

Additionally, with the state's decision to decrease residential treatment services, we made the difficult decision to close Wolverine Secure Treatment Center, underscoring the urgency of our mission to find innovative ways to meet the evolving needs of children in our care.

Mission & Purpose

**In everything we do, our mission remains the same
“Helping Children and Families to be Victors.”**

Our purpose is to offer the most appropriate settings and most effective service providers to children, their families and their communities. We take part in a mutual effort assisting those in need to overcome social and economic barriers, to capitalize on their personal strengths, and to contribute to their own healing.

Our approach is eclectic and is founded on the premise of “unconditional” care. Wolverine’s continuum of services and effective network of referral sources provide a responsive and cost-effective system accessible at the community level.
